EXAMINER

MAH, CHUCK Y

ART UNIT PAPER NUMBER

3677

DATE MAILED: 06/24/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/780,482	Applicant(s) PARLANTE, RICHARD B.	
	Examiner Chuck Mah	Art Unit 3676	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In both claims 1 and 11, line 3, "a strap removably attached to the grip member having a front and a back" is confusing because it is unclear whether "a front and a back" is referring to that of the "strap" or of the "grip member".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4-7 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by FR 2554782A.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3676

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over FR '782 in view of Tomita (6,491,285).

FR discloses the invention as claimed but for forming the grip member with steel and a plastic coating. '285 teaches a handle grip component made of aluminum, stainless steel, bronze, titanium and other suitable metal to enhance strength and durability. The handle component is coated with a plastic finish to prevent abrasion (col. 5, lines 3-17). It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the grip member of FR with steel and a plastic coating as taught by '285 to enhance durability of the grip member.

7. Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over FR '782 in view of Meldeau (5,353,440).

FR does not show an adjuster. '440 teaches a strap (38) having an adjuster (44) to adjust the length of the strap as it is brought around the wrist. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the strap with an adjuster as taught by '440 for adjusting the length of the strap.

8. Claims 1, 4-11 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meeko (4,487,412) in view of Meldeau '440.

'412 discloses the invention as claimed but for the strap with two ends. '440 teaches a strap (38) having two ends and an adjuster (44) to adjust the length of the strap as it is brought around the wrist. It would have been obvious to one of ordinary

Art Unit: 3676

skill in the art at the time the invention was made to modify the strap with two ends and an adjuster as taught by '440 for adjusting the length of the strap to fit the wrist of different users.

9. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meeko '412 in view of Tomita '285.

'412 discloses the invention as claimed but for forming the grip member with steel and a plastic coating. '285 teaches a handle grip component made of aluminum, stainless steel, bronze, titanium and other suitable metal to enhance strength and durability. The handle component is coated with a plastic finish to prevent abrasion (col. 5, lines 3-17). It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the grip member of '412 with steel and a plastic coating as taught by '285 to enhance durability of the grip member.

10. Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meeko '412 in view of Graham (6,824,182) or Hansen et al. (5,772,118).

'412 discloses the grip as claimed but for placing the handle of a shopping bag or of a briefcase into the grip. '182 teaches a grip member for carrying shopping bags, briefcases and any other bags with handles to eliminate the amount of stress that is placed directly on the fingers and hand. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the grip of '412 to carry shopping bags or briefcase as taught by '182 to eliminate stress on the fingers and hand.

As to claim 13, Hansen et al. '118 teaches using the grip to carry a luggage handle. It would have been obvious to one of ordinary skill in the art at the time the invention was made to extend the use of the grip to carry a luggage as taught by '118 to reduce the stress on the fingers and hand.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuck Mah whose telephone number is (571)272-7059. The examiner can normally be reached on 5/4-9.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on (571)272-7049. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
